

BUILDING WITH THE MASTERS

The Thoroughbred Limited 2015 'Building with Masters' Clinic will use the MCR, **Limited Edition** laser-cut wood kits of a PRR passenger shelter as shown above. It will be presented Friday afternoon at a time to be determined. The Passenger Shelter wood kits contain one complete building and all materials needed for the construction at the clinic. The Clinic cost is \$10 and it is limited to 25 participants. The kits are available in N, HO, and S scales. The kits are wood laser-cut kits manufactured by Mountaineer Precision Models exclusively for the MCR as a limited production run and only limited quantities are available. There are 18 HO kits, 8 S kits and a bunch of N kits. The building is approximately 12 feet by 13 feet. This is the second project kit offered in the MCR prototype series and will be available at the 2015 MCR Convention until supplies are exhausted. The Clinic Instructors are Dick Briggs, Bob Fink and Gary Burdette, all MMR's.
